```

Aquapreneur® represents Strategro's activity within the marine biotech and marine products area.

We are well experienced helping companies with marine-related ideas, products, or discoveries develop into commercial success.

In addition, we provide access to a comprehensive network of industry experts, aligning business opportunities with strategic collaboration partners and appropriate resources to help accelerate marine biotech-related product development and time-to-market.

Selected areas of activity include:

- Marine Biotechnology
- Consumer and industrial applications
- Discovery and development of new bioactive compounds
- Local and international R&D collaborations
- Marine Products and Ingredients
- Utilization of value-added fish and marine byproducts
- Product and ingredient applications: food, nutraceutical, supplements, cosmetics
- Sales, marketing, business development, regulatory compliance
