Company invited to speak on Utilization of Marine Resources for Pacific Rim Summit on Industrial Biotechnology and Bioenergy, Vancouver, BC, in September 2008

West Orange, NJ (July 13, 2008)-- Stratego International has been selected to speak at the upcoming Pacific Rim Summit on Industrial Biotechnology and Bioenergy starting September 10, 2008 in Vancouver, British Columbia. The international event, organized by the Biotech Industry Organization (BIO), brings together scientists, government officials, industry executives and investors from North America and throughout the Pacific Rim region to highlight recent advances within the industrial biotech space.

Steve Dillingham, Stratego Principal and Founder, will represent Stratego at the Summit and present examples of companies and clusters globally that are leading developments within the marine biotech industry. These findings will be compared against Dillingham's interpretation of what the future likely holds for North America for the development of products stemming from the marine environment, and include thought-provoking perspective what can and must be done to facilitate and expedite better utilization of our marine resources utilizing marine biotechnology.

"The U.S. as a whole should be doing a much better collective effort utilizing its seafood byproduct waste to create value-added products," stated Dillingham. "If you look how much activity is taking place with waste reclamation and conversion within the Bioenergy field as a result of the DOE funding, you can guess how impactful this sort of "man on the moon" mission and funding support would be towards the seafood processing and byproduct industry -- not to mention the ecological and environmental benefits," continued Dillingham.

The Industrial Biotech Summit will run for three days, and feature presentations on bio-energy, bio-based products, industrial biotechnology for drug discovery and production, novel applications of marine biotechnology, and nanotechnology

### About Stratego International, LLC

Stratego International is a market entry and business growth firm working with companies and organizations within the functional foods, nutraceuticals, marine biotechnology, and life science sectors. Stratego publishes two free quarterly publications, NutraTrends® and Aquapreneur® ([www.aquapreneur.com](http://www.aquapreneur.com)), covering recent commercial developments within functional foods and ingredients and the marine biotech and marine products sectors, respectively. In addition Stratego International works with trade groups, governments and economical development organizations to enhance cluster development, innovation and growth within industry sectors, utilizing Stratego's SectorStim®; cluster development approach.

Stratego International has offices in the U.S. and Canada.
